Office Action Summary

Art Unit: 2876

Rejections will be based on the following criteria the criteria for applicant and/or counsel is ordinary skill in the art, i.e., a knowledge of all prior art including the ability to read, comprehend and to point out the claimed invention compared to the prior art concepts. The applicant is considered to have the pertinent prior art before him during conception and reduction to practice of the invention in light of this prior art including drafting the specification and claims. The applicant is considered to be aware that to merely substitute or additionally employ one or more teachings of one or more of the references before him in a combinational sense would clearly be within the purview of obviousness, the motivation being the skilled artisan's recognition of the interchangeable teachings of similar systems and the expedient of a substitutive or an additive employment of one or more prior art system concepts to provide a particular solution or to bring about a desired result.

32 U.S.C. 112 rejections:

- a. The disclosure, like the claims must point out the invention. A disclosure in which the lexicography is unclear. Vague, convoluted or incomplete does not comply with the statute.
- b. A disclosure which merely discusses prior art concepts without really setting a forth on independently arrived at enabling disclosure does not comply.
- c. Claims based on a disclosure as above or are vague, incomplete or merely expressions or desired results do not comply with the statute.

35 U.S.C. 103 rejections and motivation.

Art Unit: 2876

The criteria here is a skilled artisan who is looking first to the prior art for aid in the conception and reduction to practice phase of inventing and who is technologically skilled in the research of patent and other documentation and in the employment of prior art concepts in substitutive and additive combinations to address and implement a system, having collected and subjected the pertinent prior art (such as cited here in) and viewing the prior art technique of employing the desired inventive concepts in or more combinations to provide successfully similar solutions and which considered in combination address applicant's essential inventive concept, would find in such an addressing the "suggestion" or "suggestions" or "motivation" that the prior art concepts might be successfully employed in combination as set forth in applicant's claims.

35 U.S.C. 102 rejections;

A rejection under 35 U.S.C. 102 indicates that the claims, drafted in light of one or more references, fail to point and distinctly claim any discernible novel essential inventive concept.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless--

(B) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2876

(A) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as whole would have been obvious at the time the invention was made to a person having an ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-42 are rejected under U.S.C. 112. Whole presentation is unclear. There are numerous independent claims which appear to be drawn to separate inventions. Prove unity or make selection. Claims appear to be ^{counted} ~~counted~~ in non-structural forms of desired results. Read each claim term by term on the drawing.

As understood, claims appear to be essentially taught under 35 U.S.C. 102/103 by the numerous "X" and "Y" references as discussed in the PCT. Compare claims to these references. ^{figs 1-4} ~~figs~~ an IDS indicating a U.S. Search and with English language equivalents or foreign references cited on the PCT.
